# Joint Synthesis and Evaluation (S&E) Workshop

SME Cluster Development and Export Consortia Formation Business Database Development in the SEC

June 8 - 9, 2017

Mekong Institute (MI) Khon Kaen, Thailand

## Acknowledgements

Mekong Institute (MI) would like to acknowledge the active participation of project beneficiaries and stakeholders from the 19 provinces along the Southern Economic Corridor (SEC) in Cambodia, Myanmar, Thailand and Vietnam (CMTV) to the Joint Synthesis and Evaluation (S&E) Workshop on SME Cluster Development and Export Consortia Formation and Business Database Development in the SEC. The participants successfully presented and shared outcomes, experiences, lessons learned and best practices from the Action Plans (APs) Implementation from the two regional training programs conducted in 2016. The participants also effectively evaluated their APs implementation.

The Joint S&E Workshop could not have been accomplished without the kind and generous support from the Government of Japan through the Japan-ASEAN Integration Fund (JAIF).

Lastly, our sincere appreciation also goes to the Project Team of Trade and Investment Facilitation (TIF) Department, the team of Monitoring, Evaluation and Learning (MEL) Department and all the Mekong Institute (MI) staff members for their support and assistance to ensure the successful completion of the Joint S&E Workshop.

Trade and Investment Facilitation (TIF) Department Mekong Institute

> Khon Kaen, Thailand June 2017

#### **Executive Summary**

Mekong Institute (MI) organized a two-day Joint Synthesis and Evaluation (S&E) Workshop on "SME Cluster Development and Export Consortia Formation" and "Business Database Development in the SEC" on June 8-9, 2017 at its Residential Training Center. The Workshop is part of the project on "Enhancing Competitiveness of Small and Medium-sized Enterprises (SMEs) in the Southern Economic Corridor (SEC) of ASEAN Mekong Subregion (AMS)" funded by Japan – ASEAN Integration Fund (JAIF).

Twenty-nine (29) representatives of SME product clusters, provincial trade and industryrelated departments, chambers of commerce and industries (CCIs) and business associations (BAs) from 19 project provinces in CMTV attended the Workshop. Participants have implemented the APs since the completion of the two regional training programs conducted in 2016. The S&E Workshop is a consolidated event where MI provided a highly interactive platform for the participants to review, reflect and learn from each other on their APs implementation.

Participants also shared and obtained feedback from the co-participants regarding the progress, outputs and lessons learned from the individual AP implementation. They first reported the achievements obtained - such as product certifications, development of new product package design, purchase of production equipment, the creation of product brochure and the collection of business profiles. However, the participants also raised existing challenges and additional capacity building needs essential for cluster development and business database development (e.g. product quality, farming and production technologies, value addition, production cost, finance and human resources, sales and marketing, product export procedure, identification of regional and global markets and profiling of business data.)

At the same time, the monitoring and evaluation (M&E) of the AP implementation progress through group discussion was conducted. The participants shared the most challenging parts of APs implementation, the implementation strategies, the technical assistance, and external resources needed.

MI will take suggestions, recommendations and capacity building needs into account, and will continue to assist the project's beneficiaries and stakeholders in improving capacity and competitiveness, especially for SMEs in the SEC under the project framework.

## Joint Synthesis and Evaluation (S&E) Workshop

SME Cluster Development and Export Consortia Formation Business Database Development in the SEC

#### 1. Introduction

The Mekong Institute (MI) conducted Regional Trainings on "SME Cluster Development and Export Consortia Formation" on September 12-17, 2016 and "Business Research and Database Development in the SEC" on November 14-18, 2016 respectively at its Residential Training Center, Khon Kaen, Thailand. These regional training programs are the integrated part of the two-year project on "Enhancing Competitiveness of Small and Medium-sized Enterprises (SMEs) in the Southern Economic Corridor (SEC) of ASEAN -Mekong Subregion (AMS)" from 2016 to 2018, funded by Japan-ASEAN Integration Fund (JAIF).

Abovementioned two regional training programs followed a modular cycle approach which includes three phases which are (i) **Learn to Do** (regional training programs at MI); (ii) **Do to Learn** (APs Implementation by the participants in the project provinces); and (iii) **Share to Learn** (Synthesis and Evaluation (S&E) Workshop at MI for the participants to report and share outcomes, experiences, lessons learned and best practices from the APs Implementation).

Figure 1. Modular Training Approach

As part of the "Do to Learn" approach, the participants implemented Action Plans (APs) on SME cluster development and business profiles collection covering (i) provincial profiles; (ii) company / SME profiles including technological support requests; and (iii) Trade Promotion Organization (TPO) profiles for uploading in the SEC business database at <u>www.sec4business.com</u>. The APs were conducted in 19 project provinces in the SEC from October 2016 to May 2017 with the support and assistance by the team of Trade and Investment Facilitation (TIF) Department of MI.

To report and share the progress and outcomes of the APs Implementation and monitor and evaluate APs Implementation, MI organized a two-day Synthesis and Evaluation (S&E) Workshop at its Residential Training Center on June 8-9, 2017.

## 2. Objectives

• Revisit the knowledge gained from the Regional Training Programs on (i) SME Cluster Development and Export Consortia Formation; and (ii) Business Research and Database Development in the SEC; and the real application of these knowledge and skills;

- Share the outcomes and experiences from the APs implementation and obtain feedbacks from co-participants;
- Provide an opportunity to learn and share best practices and to utilize results of learning process;
- Evaluate the modular training approach and provide recommendations for its improvement in terms of contents, structure and duration.

## 3. Expected Outputs

- Participants shared the outcomes and experiences from the APs implementation and received feedbacks from co-participants;
- Participants shared and learned best practices from the APs implementation;
- Participants provided suggestions and recommendations for the further improvement of the modular training approach in terms of contents, structure and duration.

## 4. Workshop Structure

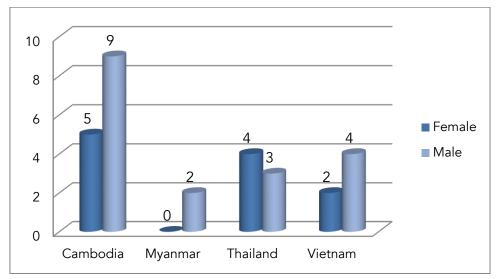

The workshop was organized in the form of back-to-back events. The first part was set for the reflection on the implementation of the individual AP on SME Cluster Development and Business Profiles Collection through an interactive platform for the participants to present and share outcomes, experiences, lessons learned and best practices from the APs implementation. The second part was set for the discussion between the participants and the MI Monitoring, Evaluation and Learning (MEL) Department to monitor and evaluate the APs implementation.

## 5. Participants

A total of twenty-nine (29) participants, representing SME product clusters, provincial trade and industry-related departments, CCIs and BAs from 19 project provinces in CMTV attended the Workshop.

They comprised fourteen (14) from Cambodia, two (2) from Myanmar, seven (7) from Thailand and six (6) from Vietnam. Among them, eleven (11) were female and eighteen (18) were male. In terms of sectors, twelve (12) participants or 41% are from the public sector, and seventeen (17) participants or 59% are from the private sector.

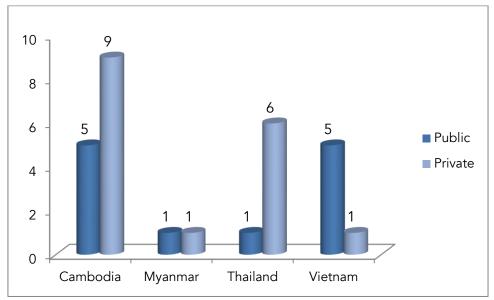

Figure 2. Participants Ratio

## 6. Program Contents

#### 6.1. Welcome and Opening Remarks

*By Mr. Madhurjya Kumar Dutta (OIC: Officer-in-Charge) Director, Trade and Investment Facilitation (TIF) Department, Mekong Institute (MI)* 

On behalf of the MI Executive Director, Mr. Dutta welcomed all the participants to the MI and expressed MI's appreciation for participants' hard work in implementing two APs. Mr. Dutta emphasized that the Workshop is a co-learning event where MI and

participants learn from each other. There is presence of representatives from CMTV and the Workshop is also an opportunity to share experiences between countries. Mr. Dutta wished all the participants for the successful two-day Workshop.

## 6.2. Overview of the Joint S&E Workshop

*By Mr. Toru Hisada, Senior Project Coordinator, Trade and Investment Facilitation (TIF) Department, Mekong Institute (MI)* 

Mr. Hisada discussed the modular training approach MI adopts, which is **'Lean to Do,' 'Do to Learn'** and **'Share to Learn.'** He also explained the objectives, expected outputs and daily wise program schedule of the Workshop.

#### 6.3. Session I: Individual Presentation on the Implementation of CDP

Facilitator: Mr. Sa-nga Sattanun, Program Manager, Trade and Investment Facilitation (TIF) Department, Mekong Institute (MI).

#### 6.3.1. Presentation of Market Information Tool (Poster / Flipchart)

This session was designated for the participants, through posters and flipcharts, to present their clusters and products information to co-participants who acted as regional investors and buyers. Through this exercise, participants gained more confidence in presenting their clusters and products to regional byers and investors that help them in expanding their market to regional level.

#### 6.3.2. CDP Implementation Outcome Presentation and Evaluation

This session was designed for the participants to reflect his / her Cluster Development Plan (CDP) implementation such as key results, lessons learned, best practices, recommendations / suggestions for future improvements and future plans. Country wise presentation was organized and each participant was given 10 minutes to present their CDP implementation in PPT format. Another 5 minutes were followed for the Q&A session. The Tables 1-4 below shows the key results, lessons learned and best practices from the CDP implementation and recommendations / suggestions for future improvements and future plans by each cluster group.

| No.      | Province                   | Cluster Development Plan (CDP)                     |  |

#### 6.4. Session II: Individual Presentation on Business Profiles Collection

Facilitator: Mr. Sa-nga Sattanun, Program Manager, Trade and Investment Facilitation (TIF) Department, Mekong Institute (MI).

This session was designated for the participants to reflect APs Implementation on Business Profiles Collection such as progress / outputs, lessons learned and recommendations / suggestions for future improvements. Country wise presentation was organized and each participant was given 5 minutes to present their APs implementation in PPT format. Another 5 minutes were followed for the Q&A session. The Tables 5-6 shows the progress / outputs, lessons learned and recommendations / suggestions for future improvements

from the APs implementation on business profiles collection.

#### 6.5. Session III: Review of Modular Training Approach

#### Facilitator: Monitoring, Evaluation & Learning (MEL) Department, Mekong Institute (MI)

This session was designated to share the progress of two APs being undertaken by the participants and highlight pending tasks. It also provided an opportunity for the interaction among participants from different provinces and countries for sharing experiences, challenges and lessons learned from the APs implementation.

#### 6.5.1. Presentation on the Progress of Action plans

#### Presenter: Mr. Nazil Ul Haq, Program Officer, Monitoring, Evaluation & Learning (MEL) Department, Mekong Institute (MI)

Mr. Haq presented the progress of two APs by the project beneficiaries and stakeholders. For the AP on cluster development, according to the project monitoring tools, out of a target of 141 sub-activities for all the action plans, 60 sub-activities have been completed so far (39.47%). 53 sub-activities are in progress whereas there is no information about the remaining 28 sub-activities. Table 7 shows the progress of the CDP implementation in 19 project provinces in CMTV.

| Country  | Provinces # of Sub # of Sub # of Sub # of Activities |            | Sub-       | Sub-        | Sub-        |            |                |             |

## Table 7: Progress of CDP Implementation

Mr. Haq also showed the progress of the business profiles collection to all the participants. With three different types of business profiles including "Provincial Profiles", "TPOs Profiles" and "Company Profiles," the progress of these profiles collection was assessed as compared to the targets. According to the data analysis, 5 out of 19 provincial profiles, 18 out of 158 TPOs profiles and 135 out of 932 company profiles have been completed so far. Table 8 shows the progress of each type of profiles for the project provinces and countries.

|          |                | Provincial Profile |           |          | TPO /Association Profile |            |         |           | Company Profiles |      |            |         |           |          |      |            |

## Table 8: Progress of Business Profiles Collection

#### 6.5.2. Group Discussions and Presentations

Facilitator: Mr. Qinfei Zhu, Program Specialist, Monitoring, Evaluation & Learning (MEL) Department, Mekong Institute (MI)

The participants from each country were divided into groups based on the types of APs implemented. Three groups were formed for the AP on Business Profiles Collection, representing each country (except Myanmar). Also, five groups were formed for the AP on the Cluster Development.

#### - Group Discussions

Groups of the APs on the cluster development were tasked to review the list of activities implemented under the CDP and discuss the progress with other members of the group. Also, groups of the APs on Business Profiles Collection were tasked to review the types of information required in each business profiles form including (i) provincial profile form; (ii) company profile form; and (iii) TPO profile form. Each group discussed the challenges and difficult aspects of the APs implementation, the possible solutions and the kind of technical assistances or resources required.

#### - Presentation of group discussions

Following the group discussions, one representative from each group presented the outcomes of their discussions. Tables 9-10 show the summary of the discussions.

| Challenges   | Proposed Strategies / Solutions   | Required Assistance / Resources  |
|--|---|--|
| Cambodia (Group 1)   |   |  |
| Low technical skills among the cluster members to produce standard products.   | Training course for cluster members for<br>compliance to technical standards of the<br>products.  | MI and the government can work together. MI can develop training course.   |
| Lack of financial support to buy equipment and useful machines.  | Cooperation among the cluster members and cooperation with other stakeholders.  | Assistance of government and other relevant agencies.  |
| Some of the clusters' members are not well<br>aware of marketing and promotion of their<br>products.   | Cluster members can help out each other regarding the use of marketing techniques such as social media.   | Support from cluster members and MI.   |
| Cluster members, other than those who<br>attended the MI's events, are not open to new<br>knowledge, information or resources.   | Some kind of consultancy for such members.  | MI can provide support.  |
| Cluster members do not follow proper packaging standards.  | Different tools including internet can be used<br>to learn about good and attractive packaging<br>techniques.   | MI can also give some assistance in this regard.   |
| Cambodia (Group 2)   |   |  |
| Limitation of cluster's capital and financial<br>support. If cluster gets loan from the bank, the<br>interest is high. Request for financial support<br>from MI is another option, but it is unlikely to<br>be possible. | Find capital from government or other<br>financial institutions to support cluster with low<br>interest rates.  | Support from the banks, NGOs, government and MI.   |
| The rules and regulations in Cambodia do not<br>support the registration of SME cluster. It takes<br>2-6 months to register.   | Try to ask government to adjust the policy to save time for registration.   | Need assistance from the government in registration.<br>Maybe there should be new department to take care<br>of this specifically. |
| Communication among clusters and between clusters and government is not good.  | Facilitate better communication among<br>clusters and between clusters and<br>government. Maybe install one stop service for<br>the communication between all stakeholders. | Find new and different ways to communicate between parties.  |
| Lack of materials and machines. Cluster needs to import but the cost of import is high.  | Try our best to afford machine and raw materials in order to help cluster to develop  | Try to afford machines and raw materials by ourselves first. But if we cannot afford, we may borrow money                          |

## Table 9: Challenges and Proposed Strategies on CDP Implementation

|   | further.  | from bank, other partners or other clusters.  |
|---|---|---|
| Myanmar   |   |   |
| Some laws and rules are not suitable in our country.  | Government should commit in adjusting laws and rules.   |   |
| The cluster needs lots of support, providing information.   | Cooperation between government, private<br>and public sectors, NGOs, IGOs and<br>corporations, can help gather information.                                   | Conduct lots of trainings to provide people with information.   |
| Export market promotion.  | Create network between countries, private and public sectors and relevant parties.  | To promote export, links between countries should be<br>strengthened and infrastructure like roads and power<br>stations should be developed. |
| Thailand  |   |   |
| The clusters who want to export to global<br>markets lack experts in export and deal with<br>different regulations. | Trade or export fairs will link the export<br>oriented clusters to other export service<br>providers or trading companies.                                    | MI can provide export related training program to the clusters.   |
| Export quotas for rice. Only limited entities benefit from the current regulations.                                 | Lobby the government to create fair practice and regulations for everybody.   | MI may also work as intermediary between the SMEs and the clusters and advocate for favorable policies.                                       |
| Financial and other resources for promoting the tourism – Trat.   | Government assistance to promote tourism in<br>Trat by sharing tourism information.   | MI may provide assistance.  |
| Access to farming technology in the face of rising labor wages.   | Accessibility of drone like technologies for spraying fertilizers or agrochemicals.   | MI can provide information about different farming<br>technologies being used in other developed countries<br>such as Japan etc.              |
| There is a strong need of translation facilities<br>in marketing different products and tourist<br>places – Trat.   | Availability of translators.  | MI can provide such facilities if feasible.   |
| Vietnam   |   |   |
| Lack of information about machinery and equipment.  | Research for information on website,<br>technology exhibition, and technology seminar<br>to find information about machines and<br>equipment that are needed. | MI can help us to connect to enterprises in Japan that have relevant technologies.  |
| Lack of market and export information.  | Find new and high markets for products.   | MI can help support in providing information on the market for Pangasius and snake skin.  |
| Lack of globally accepted certifications of   | Apply business management practice (BMP)  | MI can help us to connect to SMEs in Japan (to learn  |

| product development quality.                       | Certification & Global GAP Certification for<br>product development. | about standard of export to Japanese market). |
|--|--|---|
| Product design development is not up to standards. | Find expert in brand design.   | Find consultant on brand design in Vietnam    |

# Table 10: Challenges and Proposed Strategies on Business Profiles Collection

| Challenges  | Proposed Strategies / Solutions               | Required Assistance / Resources                    |
|---|---|--|
| Cambodia  |   |  |
| Provincial Profile                                | In order to meet these challenges, the        | The responsible persons require additional human   |
| In the provincial profile, it's hard to record    | responsible persons contact and involve       | resource, transportation facility and may be extra |
| information / data on the total amount of rain,   | relevant departments to provide the required  | financial resources.                               |
| economic indicators, insurance companies and      | information such as department of water       |  |
| research and development centers.                 | resource and meteorology, tax and customs,    |  |
|   | economics and finance, and department of      |  |
|   | planning.                                     |  |
| Company Profiles                                  | The responsible persons try to lobby the      |  |
| Information about the trade capacity, award       | companies and convince them to provide the    |  |
| and technology request would be hard to           | required information. For technology request, |  |
| collect. For trade capacity, the companies        | they try to make the companies realize the    |  |
| might treat the information as classified or      | importance and advantages of the information  |  |
| they do not keep record of such data.             | for them.                                     |  |
| Another Cambodian group highlighted that          | - 1   |  |
| the companies to be profiled are scattered        | challenges.                                   |  |
| and at large distance from the provincial         |   |  |
| centers. Given these distances, it's not feasible |   |  |
| to complete the tasks within the given time.      |   |  |
| TPO Profiles                                      | Try to motivate and convince the TPO          |  |
| Information about trade promotion and             | directors and CEOs to provide the required    |  |
| investment promotion component in the             | information on trade and investment           |  |
| profile is difficult to collect. Communication    |   |  |
| with the directors or CEOs of TPOs will also be   | collection for the development and growth of  |  |
| challenging.                                      | TPOs.   |  |

| Thailand   |   |  |
|--|---|--|
| <b>General</b><br>With a large number of companies and TPOs  | Editable pdf file saves considerable time in this regard where data can be easily verified and  | MI can provide profile formats in editable pdf version.  |
| to be profiled, the responsible people for<br>profiling cannot find time to meet all the<br>stakeholders and may not be able to complete<br>the tasks on time. | coordinated. And it is easier to upload pictures and certificates as well.  |  |
| Some of the stakeholders do not understand<br>the benefits of all the profiles and do not<br>cooperate in compiling them.                                      | It is proposed that MI may offer some benefits<br>to the companies / stakeholders after receiving<br>the data.  | MI to send official letters to different stakeholders for getting their cooperation and offer some benefits. |
| Instead of Doc. File, editable pdf file will be more helpful for collecting uniform data.  | Editable pdf file for data collection.  |  |
| Some of the companies do not feel<br>comfortable providing confidential or<br>classified information as required in the<br>profiles.                           | MI can leave room for some confidential<br>company data. If the companies get some<br>tangible benefit at present time, they will be<br>willing to provide confidential information as<br>well. |  |

# 6.6. Participants' Speech

In the closing ceremony of the Workshop, representative from each country delivered a short speech. All speakers expressed the importance and the satisfaction on the learning process of the modular training programs. They also expressed sincere thanks to Japan – ASEAN Integration Fund (JAIF) and MI for their support in providing opportunity to take part in the modular training program.

## 6.7. The Way Forward and Closing Remarks

By Mr. Madhurjya Kumar Dutta, Director, Trade and Investment Facilitation (TIF) Department, Mekong Institute (MI).

Mr. Dutta expressed appreciation for the active participation and contribution of the participants, which resulted in the success of two-day Joint S&E Workshop. He discussed the upcoming activities set forth under the Project framework which aims to improve the project beneficiaries and the stakeholders. These activities include cross-border trade events in the SEC (which are held as APs on the Regional Training on Trade Events Promotion), Structured Leaning Visit (SLV) and Investors Forum. He said that it is the responsibility of project

stakeholders including SMEs and BDS providers to develop themselves further but the MI has been and will continue to support the process and for the cooperation and collaboration among the stakeholders in the SEC and beyond. Mr. Dutta emphasized that cooperation and collaboration are very important and we can survive, stand and grow only if we work together.

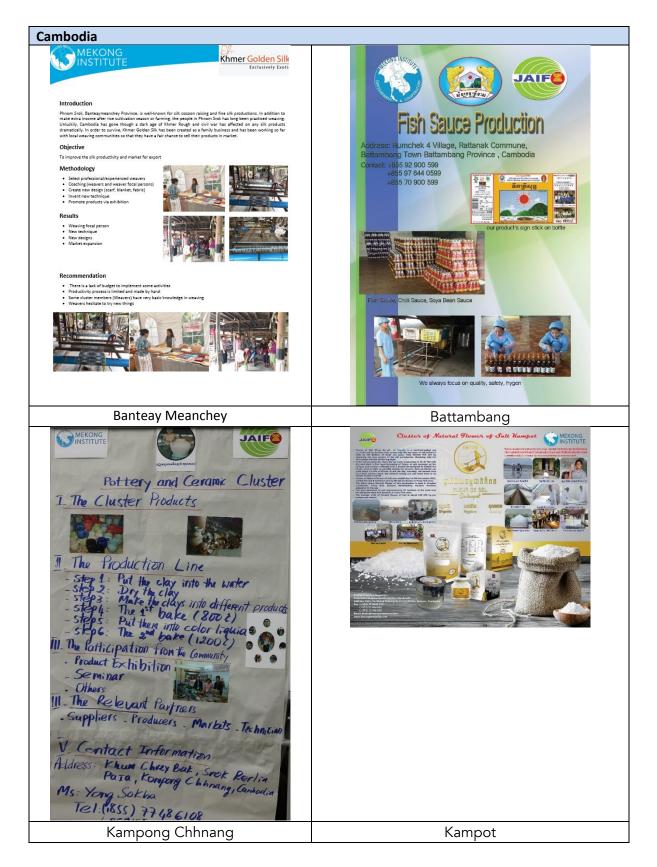

# 7. Conclusion

In the two-day Joint S&E Workshop on SME Cluster Development and Export Consortia Formation and Business Database Development in the SEC, participants reflected and shared outcomes, experiences, lessons learned and best practices and learned from coparticipants on their APs implementation. The progress of the APs Implementation was also presented in the Workshop by comparing the achievements against the targets. The presentation clearly put out the progress of two APs and highlighted the remaining works to be completed by the project stakeholders.

MI will take suggestions, recommendations and capacity building needs into account, and will continue to assist the project's beneficiaries and stakeholders in improving capacity and competitiveness, especially for SMEs in the SEC under the project framework.

## 8.3. Concept Note

# Joint Synthesis and Evaluation (S&E) Workshop SME Cluster Development and Export Consortia Formation and Business Database Development in the SEC

## Mekong Institute (MI), Khon Kaen, Thailand

## June 8-9, 2017

#### 1. Background

Mekong Institute (MI) conducted Regional Trainings on "SME Cluster Development and Export Consortia Formation" on September 12-17, 2016 and "Business Rearch and Database Development in the SEC" on November 14-18, 2016 respectively at its Residential Training Center, Khon Kaen, Thailand. These regional training programs are the integrated part of the two-year project on "Enhancing Competitiveness of Small and Medium-sized Enterprises (SMEs) in the Southern Economic Corridor (SEC) of ASEAN - Mekong Subregion (AMS) from 2016 to 2018, funded by Japan-ASEAN Integration Fund (JAIF).

As part of the training programs, the participants implemented Action Plans (APs) on SME cluster development and buisness profiles collection covering (i) provincial profiles; (ii) company / SME profiles including technological support requests; and (iii) Trade Promotion Organization (TPO) profiles for uploading on the SEC business database at <u>www.sec4business.com</u>. The APs were conducted in 19 project provinces in the SEC from October 2016 to May 2017 with the support and assistance by the team of Trade and Investment Facilitation (TIF) Department of MI.

To review the result of the APs Implementation and obtain feedback on the modular training programs, a two-day Synthesis and Evaluation (S&E) Workshop is conducted on June 8-9, 2017 at Mekong Institute, Khon Kaen, Thailand. The S&E workshop aims to (i) provide a platform for participants to reflect and learn from each other on their APs implementation; and (ii) to share outcomes, experiences, lesson learned and best practices from the APs implementation.

#### 2. Objectives

- a) Revisit the knowledge gained from the Regional Training programs on (i) SME Cluster Development and Export Consortia Formation; and (ii) Business Research and Database Development in the SEC; and the real application of these knowledge and skills;
- b) Share the outcomes and experiences from the APs implementation and obtain feedbacks from co-participants;
- c) Provide an opportunity to learn and share best practices and to utilize results of learning process;

d) Evaluate the modular training approach and provide recommendations for its improvement in terms of contents, structure and duration.

### 3. Expected Outputs

- a) Participants shared the outcomes and experiences from the APs implementation and received feedbacks from co-participants;
- b) Participants shared and learned best practice from the APs implementation;
- c) Participants provided suggestions and recommendations for the further improvement of the modular training approach in terms of contents, structure and duration.

#### 4. Workshop Structure

The workshop is organized in the form of back-to-back events. The first part is scheduled for the reflection on implementation of the individual APs on SME Cluster Development and Business Profiles Collection through an interactive platform for the participants to present and share outcomes, experiences, lessons learned and best practices from the APs implementation. The second part is scheduled for discussion between the participants and the MI TIF team to evaluate and improve the modular training approach. The both parties provide feedbacks, suggestions and recommendations for improvement in terms of contents, structure and duration.

#### 5. Target Participants

Participants who implemented the APs are invited to participate and share outcomes, experiences, lessons learned and best practices with co-participants and provide feedbacks on the modular training approach at the joint S&E Workshop.

#### 6. Organizing Team and Contact

#### Mr. Madhurjya Kumar Dutta

## The Greater Mekong Sub-Region (GMS)

The Greater Mekong Sub-Region (GMS) comprises five Southeast Asian countries and two provinces of China sharing the Mekong River, namely Cambodia, Lao PDR, Myanmar, Thailand, Vietnam and Yunnan Province, Guangxi Autonomous Region of the People's Republic of China

### About Mekong Institute

The Mekong Institute (MI) is a **GMS** Inter - Governmental Organization (IGO) working closely with the governments of six countries to promote regional development, cooperation and integration by offering standard and on-demand capability development programmes across three cutting themes of agricultural development and commercialization, trade and investment facilitation, and innovation and technological connectivity.
